Thrilled to partner with AMI Labs alongside our strategic partners through the Greycroft CCS Sustainability Fund, including [The Coca-Cola Company](#), [Arca Continental](#), [Coca-Cola Consolidated](#), [Coca-Cola Europacific Partners](#), [Coca-Cola FEMSA](#), [Coca-Cola HBC](#), [Coca-Cola Bottling Company UNITED, Inc.](#), [Reyes Coca-Cola Bottling](#), and [Swire Coca-Cola](#).

We are entering a new era of AI.

Over the past decade, predictive and generative systems have reshaped how we analyze data, retrieve knowledge, and create content at global scale. The next step is moving beyond systems that react to historical data toward intelligence designed to understand how the world works.

Much of real-world data is continuous, high-dimensional, and noisy. It unfolds over time and cannot be reduced to a sequence of prompts. Operating in these environments requires persistent memory, the ability to model cause and effect, and systems that can reason and plan as situations evolve.

AMI - Advanced Machine Intelligence is developing universally intelligent systems centered on world models. By learning structured internal representations from continuous streams of real-world data, AMI aims to enable systems that operate within real-world constraints while remaining controllable and safe.

We are proud to co-lead AMI's \$1.03B round and partner with [Yann LeCun](#), [Alex LeBrun](#), [Saining Xie](#), [Pascale Fung](#), [Michael Rabbat](#), [Laurent Solly](#), and the broader team as they build.
