I first met **Alex LeBrun** almost 20 years ago 🧑🏻 at the Microsoft France HQ when he was building VirtuOz (his 1st AI company). It was back then one of the very first .net devs.

Later we worked together for many years at Facebook after the acquisition of **Wit.ai** (his 2nd AI company). I was also fortunate to invest in the pre-seed round of **Nabla** (his 3rd AI company).

So when Alex started his 4th (!) AI company, teaming up with former Facebook colleagues/legends **Laurent Solly**, **Yann LeCun**, **Michael Rabbat**, **Pascale Fung**, **Saining Xie** backing them with **20VC** was simply a no-brainer.

AMI - Advanced Machine Intelligence is building a new generation of AI systems designed to understand the world, reason, plan and operate with persistent memory, centered on world models. Global ambition on day one with teams in Paris 🇫🇷, Singapore 🇸🇬, Montreal 🇨🇦, and New York City 🇺🇸.

We are super proud to be partnering with them.
