Warren is thrilled to have taken part in this journey!

AMI - Advanced Machine Intelligence has just announced a \$1.03B Seed round to build AI systems based on world models, architectures designed to understand the structure of the real world, reason over time, and plan actions safely.

While LLMs have transformed how machines interact with language, the next frontier lies in systems that can model reality itself.

Led by **Yann LeCun**, alongside **Alex LeBrun**, **Laurent Solly**, **Pascale Fung**, **Saining Xie**, and **Michael Rabbat**, the team brings together exceptional scientific and entrepreneurial talent!

Proud to see such an ambitious frontier AI project emerging from Europe with global ambition from day one !!

Congratulations to the entire AMI Labs team and to all the investors supporting this vision, including **Cathay Innovation**, **NVIDIA**, **Temasek**, **Alpha Intelligence Capital**, **Bezos Expeditions**, **Founders Future**, **HV Capital**, **Eric Schmidt**, **daphni**, **20VC**, **AGLAÉ VENTURES**, **Greycroft**, **Hiro Capital**, **Xavier Niel**, **Mark Cuban**, **Drysdale Ventures**, and many others.

Rooting for the team as they push the frontier forward !! 🚀
