Multimodal Intelligence

Scientific Background

Brian Li

Evangelist for intelligence.
Singapore

Summary

Feeling, building, paving.

Do what you love and what you truly believe in.

Go all in, with no ceiling, without end, and without pause.

Experience

AMI - Advanced Machine Intelligence
Member of Technical Staff
February 2026 - Present (2 months)
Singapore

ByteDance
Staff Research Scientist
August 2025 - February 2026 (7 months)
Singapore, Singapore

I was in TopSeed program, selected and managed by Dr. Yonghui Wu, particularly in Seed Multimodal & World Model team.

I worked on unified multimodal model, under Haoqi Fan (one of the most brilliant guys I have ever worked with).

It's frontier and overall a nice experience.

LMMs-Lab
Chief Evangelist
January 2024 - February 2026 (2 years 2 months)
Singapore, Singapore

LMMs Lab is affiliated with NTU MMLab and was founded by Prof. Ziwei Liu together with his students, with a shared focus on advancing multimodal models research.

It is non-profit and research oriented, bringing together passionate researchers from diverse backgrounds - including both application and theoretical researchers, competitive programming medalists, and frontier hackers - united by a shared commitment to advancing multimodal intelligence.

For more details, check our website

<https://www.lmms-lab.com/>

TikTok

Researcher

October 2024 - July 2025 (10 months)

Singapore, Singapore

Tiktok@AIIC

Co-lead the development of the first generation of TikTok Visual Foundation Model, this model matched Qwen-2.5-VL's performance and even excelled at video understanding at same parameters size.

ByteDance

Researcher

November 2023 - September 2024 (11 months)

Singapore, Singapore

Research@Bytedance Seed Vision team, with Dr. Chunyuan Li

Delivered LLaVA-NeXT, LLaVA-OneVision, LLaVA-Video series.

Microsoft

Researcher

December 2022 - August 2023 (9 months)

Singapore, Singapore

Research@Microsoft Research, Redmond on multimodal models with Dr. Chunyuan Li.

Witnessed LLaVA's early stage development.

Delivered projects like Otter/MIMICIT and starts the journey exploring multimodal intelligence.

Microsoft

1 year 4 months

Research Intern

September 2021 - December 2021 (4 months)

Pudong, Shanghai, China

To continue my research@MSR Asia for the next 3 months, switch position from Starbridger to research intern.

Focus on

1. auto-regressive models. w/Yezhen Wang.
2. energy-efficient learning. w/Xinyang Jiang, Yuge Zhang

Research Assistant

September 2020 - September 2021 (1 year 1 month)

Shanghai, China

Microsoft Research Asia, Starbridge (an AI-Residency Program)

Focus on

1. domain generalization/model robustness.
2. energy-based models/auto-regressive models. (w/ Yezhen Wang).
3. low-carbon in efficient deep learning. w/Xinyang Jiang, Yuge Zhang

Research@MSR Asia

1. Learning Invariant Representations and Risks for Semi-supervised Domain Adaptation. CVPR 2021
2. Invariant Information Bottleneck for Domain Generalization. Preprint.
3. Energy-Based Open-World Uncertainty Modeling for Confidence Calibration. ICCV 2021
4. Full-Cycle Energy Consumption Benchmark for Low-Carbon Computer Vision. Preprint

I also monthly organize tech sharing@MSRA SHAI and lunch handout (usually it's KFC & McDonald) at office.

Berkeley Artificial Intelligence Research

Visiting Researcher

November 2019 - August 2021 (1 year 10 months)

Berkeley, California, United States

Research on Domain Adaptation/Generalization/Representation Learning. (onsite till August 2020 and work&collaborate remotely with Berkeley lab.)

Main works@BAIR

1. Continual Learning (w/ Dr. Sayna Ebrahimi)

2. Representation Learning & Hierarchical Pretraining (w/ Dr. Colorado Reed)
3. Domain Adaptation/Generalization (w/ Dr. Shanghang Zhang)
 - Learning Invariant Representations and Risks for Semi-supervised Domain Adaptation. CVPR 2021.
 - Rethinking Distributional Matching Based Domain Adaptation. Preprint.
4. Learning with Less Labels Project (w/ Prof. Darell Trevor's group)
5. Sim2Real Domain Adaptation (w/ Dr. Sicheng Zhao, Xiangyu Yue)
 - ePointDA: An End-to-End Simulation-to-Real Domain Adaptation Framework for LiDAR Point Cloud Segmentation. AAAI 2021.
 - Multi-source Domain Adaptation for Semantic Segmentation. NeurIPS 2019.

DiDi

Computer Vision Intern

July 2018 - November 2019 (1 year 5 months)

Beijing, China

Research on computer vision, mainly on detection/segmentation.

With one ECCV award and one NeurIPS accepted paper, thanks to Dr.

Pengfei Xu and Dr. Sicheng Zhao.

Education

Nanyang Technological University

Doctor of Philosophy - PhD, Computer Science · (January 2022 - July 2025)

Harbin Institute of Technology

Bachelor's degree, Computer Science · (September 2015 - September 2020)

University of Cambridge

Summer Engineering Camp, Engineering · (July 2017 - August 2017)

Chengdu NO.7 High School 成都市第七中学

High School Diploma, Science · (September 2012 - August 2015)
